

Things you can do
All your rhyme histories combined couldn't violate
The Prime Optimus operative
Use my hydrometer to see how warm you are
Watch me form a star, hydrogen turned to helium when I shine
Ridin' 'em, revealin' 'em, leadin' 'em, to the vacuum
Interact with tunes in my digital citadel
Critical pivotal with the mental shit on you
Spit infinity, hidden energies too dope for our planet
Star spannin', slammin' hymns with mechanical limbs
Scanning your lens with cosmic rays
You'll all get played, your brain's inferior
I hit the lateral and posterior, my science is eerier
Ionic bonding for your moronic pondering, meet the armorines
My micro machines, might throw your team, into paralysis
They not talented, just a malady, worry 'bout a salary, creative casualty
Couldn't defrag my power density intensity
Nonequivalence, nine hundred Newtons
Crush you like croutons, you plus Houston
Hiero's like dipoles inside a silo, turbulence ten-fold, never simple
Defies accepted methods development most unique
Paralyze central nervous when you close to me
Interstellar void fills with color, appears to bubble
And split into four like amoeba
Inhabitin' planets with grandiose boast and coast like Silver Surfer
Feel the purpose, high velocity, verbal atrocities
Fire resistance, better hire assistants
My pistons glisten ultra, high performance
Inside your private quarters where I fry your components
Things you can do, some can't be done
Things you can do, some can't be done
Things you can do, some can't be done
Things you can do, some can't be done
Things you can do, some can't be done
Things you can do, some can't be done
Things you can do
