

Things you can do  
All your rhyme histories combined couldn't violate  
The Prime Optimus operative  
Use my hydrometer to see how warm you are  
Watch me form a star, hydrogen turned to helium when I shine  
Ridin' 'em, revealin' 'em, leadin' 'em, to the vacuum  
Interact with tunes in my digital citadel  
Critical pivotal with the mental shit on you  
Spit infinity, hidden energies too dope for our planet  
Star spannin', slammin' hymns with mechanical limbs  
Scanning your lens with cosmic rays  
You'll all get played, your brain's inferior  
I hit the lateral and posterior, my science is eerier  
Ionic bonding for your moronic pondering, meet the armorines  
My micro machines, might throw your team, into paralysis  
They not talented, just a malady, worry 'bout a salary, creative casualty  
Couldn't defrag my power density intensity  
Nonequivalence, nine hundred Newtons  
Crush you like croutons, you plus Houston  
Hiero's like dipoles inside a silo, turbulence ten-fold, never simple  
Defies accepted methods development most unique  
Paralyze central nervous when you close to me  
Interstellar void fills with color, appears to bubble  
And split into four like amoeba  
Inhabitin' planets with grandiose boast and coast like Silver Surfer  
Feel the purpose, high velocity, verbal atrocities  
Fire resistance, better hire assistants  
My pistons glisten ultra, high performance  
Inside your private quarters where I fry your components  
Things you can do, some can't be done  
Things you can do, some can't be done  
Things you can do, some can't be done  
Things you can do, some can't be done  
Things you can do, some can't be done  
Things you can do, some can't be done  
Things you can do
