

Northern Lights

Duran Duran

Packing up
from the polar sheet
out in the stars
there's one I want to meet
I am a signal somewhere in your bliss
so do you hear
do you hear my wish? You coming down now?
you come around now
you've got a thing I
I care about
I care about
If you want to stay tonight
write your name across the sky
nothing I would rather like than
see you in the Northern Lights Up on the roof
I listen for the moan
of your soft footstep on the snow
now and then somebody else's glow
as they tune in to watch the show You coming down now
you come around now
you've got a thing I
I care about
I care about If you want to stay tonight
write your name across the sky
nothing I would rather like than
see you in the Northern Lights
If you want to play the night
we could take an evening flight
shine out from a higher height
and we'll be in the Northern Lights Write your name across the sky
