Three Days Grace

In my mind words collide
Something inside me is gone
Still I keep goin' on
In my mind oceans divide
I don't know where I belong
But still I keep holding on and on I get by in a world with no conscience
By shutting it out and being anonymous
And the problem is, you're just like me
We get by in a world with no conscience
By shouting it out and being anonymous
(Hello, hello, hello)
In my mind words collide
Something inside me is gone
Still I keep goin' on
In my mind oceans divide
I don't know where I belong
But still I keep holding on and on I get by in a world with no conscience
By shouting it out and being anonymous
And the problem is, you're just like me
We get by in a world with no conscience
By shouting it out and being anonymous
Anonymous (Hello, hello, hello)
Is there anybody out there? (Hello, hello, hello, hello)
I get by in a world with no conscience
I try and I try but I am anonymous
And the problem is, you're just like me
Just like me
I get by in a world with no conscience
By shouting it out and being anonymous
And the problem is, you're just like me
(Just like me)
We get by in a world with no conscience
By shouting it out and being anonymous
(Hello, hello, hello)
I feel so anonymous
(Hello, hello, hello)
We feel so anonymous
(Hello, hello, hello)
