

# Dark Side of the Moon (feat. Nicki Minaj)

## Lil Wayne

As I wipe the stars off the windows on my space ship  
Call out the spirits in my basement  
Crawl out the center of the snake pit  
And fall into the middle of her greatness  
Fireballs reflect off the frames of the pictures  
She's not at all impressed with the flames or the flickers  
But take her for a walk on the moon as you wear slippers  
The end of the world is coming soon, I won't miss it  
The sky is falling down, I am falling for her quicker  
We hide amongst the clouds, then we pardon the enigma  
High above the ground but I'm under her charisma  
Her sound is in surround when I'm in her solar system  
The quiet calms my quasars, the eclipses eclipsin'  
My Astronaut helmet kinda' shifted from the lipstick  
Planet of the aches, and she is my prescription  
We out of this world baby we have been evicted  
Intergalactical love  
The sky is falling, intergalactical, intergalactical love  
And I'll be waiting for you, for you, for you  
On the dark side of the moon  
Said I'll be waiting, I'll be waiting for you  
On the dark side of the moon  
And If you happen to get there before me  
Leave a message in the dust just for me  
If I don't see it I'll be waiting for you  
On the dark side of the moon (yeah, yeah, yeah, yeah) Open up the curtains  
Wonder watching, people killing-robbing  
The sky is falling, falling down  
It turns into news and this is the apocalypse  
People living on they rocket ships  
My mama always told me that there would be no stopping this  
Fireball reflections on the friends  
and the pictures in my room, of I and you  
Tell me will I see you soon  
Meet you on the moon?  
Intergalactical love  
The sky is falling, falling down  
And I'll be waiting for you, for you, for you  
On the dark side of the moon  
I'll be waiting, I'll be waiting for you  
On the dark side of the moon  
And If you happen to get there before me

Leave a message in the dust just for me  
If I don't see it I'll be waiting for you  
On the dark side of the moon (yeah, yeah, yeah, yeah) Said I'll be waiting, I'll be waiting for you  
On the dark side of the moon  
And if you happen to get there before me  
Leave a message in the dust just for me  
If I don't see it I'll be waiting for you  
On the dark side of the moon (yeah, yeah, yeah, yeah)  
Intergalactic love  
The sky is falling, intergalactic, intergalactic love  
And I'll be waiting for you  
On the dark side of the moon  
Said I'll be waiting, I'll be waiting for you  
On the dark side of the moon (yeah, yeah, yeah, yeah)
