

# Lavender and Velvet

Alina Baraz

Pull up to the city, tell me I'm your lily, I'll be in that dress you like,  
Body in vanilla, yeah, I know it thrills you  
I know what is on your mind  
Take you to a place where you could see the stars, hear nothing but the radio and  
Baby let me love you, I just wanna hold you  
We got nothing but the time I'll take you anywhere you say  
I'll take you to my hideaway  
Baby just tell me the word  
I wanna give you the world  
Let my love unravel, let me let me love you down  
Let my love unwind, let me let me love you down  
Let my love unravel, let me let me love you down  
Let my love unwind, let me let me love you down  
You're the honey whiskey, getting kinda tipsy  
You know all the things I like  
Lavender and velvet, yeah you got me melting  
You know what is on my mind Take you to the islands, I could be the pilot  
We can go wherever you like  
Baby let me love you, I just wanna hold you  
We got nothing but the time I'll take you anywhere you say  
I'll take you to my hideaway  
Baby just tell me the word  
I wanna give you the world  
Let my love unravel, let me let me love you down  
Let my love unwind, let me let me love you down  
Let my love unravel, let me let me love you down  
Let my love unwind, let me let me love you down  
I'll take you anywhere you say  
I'll take you to my hideaway  
Baby just tell me the word  
I wanna give you the love  
Let my love unravel, let me let me love you down  
Let my love unwind, let me let me love you down  
Let my love unravel, let me let me love you down  
Let my love unwind, let me let me love you down
