

Love Me Close (feat. Sad Science)

Frank Walker

Though the snow I still feel fire
Your skin, your taste, on my mouth
Your eyes are warm, they curve and smile
So leave the cold on the floor
Baby anything you say will never change my mind
I don't want to take it slow
You got me tangled up in your clothes
And my heart is racing
The rush to my head and I lose all control
What I want you already know
I don't want to take it slow
So come here and love me close
Come here and love me close
Our secret lies we'll lay them bare
Exposed in a beautiful wreck
Baby anything you say will never change my mind
I don't want to take it slow
You got me tangled up in your clothes
And my heart is racing
The rush to my head and I lose all control
What I want you already know
I don't want to take it slow
So come here and love me close
Come here and love me close
So come here and live me close
We drown in emotions
We give into our darkest dreams
Our bodies awaken
When you are laying next to me
X2 Come here and love me close
I don't want to take it slow
You got me tangled up in your clothes
And my heart is racing
The rush to my head and I lose all control
What I want you already know
I don't want to take it slow
So come here and love me close
