

Terra Incognita

Atlas Sound

I kept guards and caravans close to me
In case one day I'd need some company
I never looked out towards the wind
i never saw the families gathering around

Holy ghost

Tripled host, I saw

Carry me home

On the backs of beasts that drone

Holy sky

Opened up so wide

Carry me home

Scared me to the bone

Celestial crops carry me home

These ancient technologies strengthen my bones

I know a place called love

No one bothered me there, no I was all alone

Will you join me?

Could you possibly be

The one I sought?

The one I fought for?

A place I'd be

Able to see clearly

The beginning and end

I want to begin
