

Something

Phonte & Eric Roberson

Ain't that something
There's always something
Ain't that something
There's always something
Commitment is something I had to learn
And trust is something I had to see
If she is something I have to have
Then better is something I have to be
If time is something we cannot stop
And life is something we have to feel
Faith is something I wrestle with
But God is something I know is real
I know is real
Ain't that something
Something that leads from the dark into the light
There's always something
Something that takes your wrongs and makes them right
Ain't that something
Something that gives you strength when you need to fight
There's always something
Something to turn you around and change your life
Forgiveness is something hard to do
And truth is something we all should chase
To find something that's meant for you
Well risk is something you have to face
The other day, I walked around
Looking for inspiration
But could not find, not one smile
Everyone I'm facing
Give your time and help someone
Stop them from going under
Would you stand, hide your smile
That's something I wonder
Ain't that something
Something that leads from the dark into the light
There's always something
Something that takes your wrongs and makes them right
Ain't that something
Something that gives you strength when you need to fight
There's always something
Something to turn you around and change your life
Our father
Say we will not be denied
I promise
As long as you're by my side

I'll honor
Your mercy oh and it's true
I'm nothing
Without the something that's you Ain't that something
There's always something
Ain't that something
There's always something Ain't that something
Something that leads from the dark into the light
There's always something
Something that takes your wrongs and makes them right
Ain't that something
Something that gives you strength when you need to fight
There's always something
Something to turn you around and change your life Ain't that something
There's always something
Ain't that something
There's always something
