Something

Phonte & Eric Roberson

Ain't that something There's always something

Ain't that something

There's always somethingCommitment is something I had to learn

And trust is something I had to see

If she is something I have to have

Then better is something I have to be

If time is something we cannot stop

And life is something we have to feel

Faith is something I wrestle with

But God is something I know is real

I know is real

Ain't that something

Something that leads from the dark into the light

There's always something

Something that takes your wrongs and makes them right

Ain't that something

Something that gives you strength when you need to fight

There's always something

Something to turn you around and change your lifeForgiveness is something hard to do

And truth is something we all should chase

To find something that's meant for you

Well risk is something you have to face

The other day, I walked around

Looking for inspiration

But could not find, not one smile

Everyone I'm facing

Give your time and help someone

Stop them from going under

Would you stand, hide your smile

That's something I wonder

Ain't that something

Something that leads from the dark into the light

There's always something

Something that takes your wrongs and makes them right

Ain't that something

Something that gives you strength when you need to fight

There's always something

Something to turn you around and change your lifeOur father

Say we will not be denied

I promise

As long as you're by my side

I'll honor

Your mercy oh and it's true

I'm nothing

Without the something that's youAin't that something

There's always something

Ain't that something

There's always something Ain't that something

Something that leads from the dark into the light

There's always something

Something that takes your wrongs and makes them right

Ain't that something

Something that gives you strength when you need to fight

There's always something

Something to turn you around and change your lifeAin't that something

There's always something

Ain't that something

There's always something
