

# Waste

## Seether

Go unnoticed, let the freedom wash away  
Losing focus, the pretense is second nature  
It's a broken life that I cling to trying to make right  
I feel dismayed just like you do I feel decayed  
So find me a way to leave This wasted life behind me  
(This wasted life) So find me a way to leave  
This wasted life behind me, after all  
Yes, I see you surrounded by the hopeless  
When they need you, you're much too good and bloated  
By the hopeless life that you cling to trying to make right  
I feel disdained just like you do I feel decayed  
So find me a way to leave This wasted life behind me  
(This wasted life) So find me a way to leave  
This wasted life behind me, after all  
Go away, go away And just leave me here  
And just leave me here  
And just leave me here  
So find me a way to leave  
This wasted life behind me  
(This wasted life)  
Find me a way to leave  
This wasted life behind me  
This wasted life  
This wasted life  
This wasted life  
This wasted life
