

# Moonlight Lady

Julio Iglesias

There were beggars and kings in a magical sky  
There were wings in the air and I learned how to fly  
There was me, there was you in a world made for two  
Then you were gone Moonlight lady, come along with me  
To the bright city lights, it's all right, 'cause tonight's on me  
Moonlight lady, come along with me  
To the bright city lights, it's all right, 'cause tonight's on me She was satin and lace on the beach  
And her beauty was there to inspire  
She was loving the night in the grasp  
Of soft lit fire  
Moonlight lady, come along with me  
To the bright city lights, it's all right, 'cause tonight's on me  
Moonlight lady, come along with me  
To the bright city lights, it's all right, 'cause tonight's on me Every night is so empty without you  
I'm so lonely since you went away  
If by chance we could dance to the music  
Let it play, let me say To moonlight lady, come along with me  
To the bright city lights, it's all right, 'cause tonight's on me  
Moonlight lady, come along with me  
To the bright city lights, it's all right, 'cause tonight's on me Seems it never rains in Southern  
California  
To the bright city lights, it's all right, 'cause tonight's on me  
It never rains in California, but girl don't they warn ya  
To the bright city lights, it's all right, 'cause tonight's on me  
Seems it never rains in Southern California  
To the bright city lights, it's all right, 'cause tonight's on me  
It never rains in California, but girl don't they warn ya  
To the bright city lights, it's all right, 'cause tonight's on me
