

Ordinary Girl

[Sean Kingston](#)

It felt great when I met ya, something to remember
Body lookin right, cool like in december
We should take a flight, when wherever
'Cause your eyes take me away You're like a angel in the sky, you got wings
When you arrive it's like a midnight dream
And I can't lie, you got that tease
And shorty please don't walk away yea
Let's go!
Girl you kiss upon the girls is say
Diamond in the rough, your smile takes me away
So many girls, it's hard for me to choose
No matter where you go I'm stuck on you Oh it's so hard to look away
'Cause you're no ordinary girl
She got that thing, you can't deny Something 'bout your aura says
That you're no ordinary girl
Exceptional, one of a kind
And when we wake up in the morning and we look outside
It was the same every day after you walked by
She ain't an ordinary girl, not an ordinary girl Girl you are the one, I can't tell by over
Girl, you shine bright, brighter than my nightlight
