Wild

John Legend

I just bought a new car One where the top goes down So we can see the starsI wanna take you so far Out past the Saturn rings And into my heartI wanna drive you Wild, wild, wild I wanna love you For miles and miles We can go slow We don't need to rush I'll take the wheel, make you feel every touch I wanna drive you Wild, wild, wild Lay on the passenger's side Tell me how fast you want? We'll get there tonight Oh, oh, oh, fire You set me on fire I swear you're the only one I'd take on this rideI wanna drive you Wild, wild, wild I wanna love you For miles and miles We can go slow We don't need to rush I'll take the wheel, make you feel every touch I wanna drive you Wild, wild, wild Yeah Wanna love you, wanna touch you, wanna drive you (Wild, wild, wild) Oh, wanna love you, wanna touch youI wanna drive you Wild, wild, wild And I wanna love you For miles and miles We can go slow We don't need to rush I'll take the wheel, make you feel every touch I wanna drive you Wild, wild, wildYeah, I wanna drive you Wild, wild, wild
