

# Everything Changes

Julian Lennon

Tired of this world, all the good that we do  
Never seems to get through, it's a shame  
We've pleaded for change but the wars carry on  
Whether you're weak or strong, don't you know? I can change, you can change  
Everything wrong with our lives  
We can change all of our lives Everything changes everyday  
We've got to find a better way  
And on our hearts we've got to pray  
For something better than today, everything changes  
Tired of the lies, all the people in pain  
We all suffer the same without love  
We can't carry on with the hunger, disease  
And the threat of you dropping the bomb I can change, you can change  
Everything wrong with our lives  
We can change all of our lives Everything changes everyday  
We've got to find a better way  
And on our hearts we've got to pray  
For something better than today Everything learned from history, can't you see?  
Life is meant to be you and me  
Watching the sun go down  
Turning your life around  
Everything changes everyday  
We've got to find a better way  
And on our hearts we've got to pray  
For something better than today Everything changes  
Everything changes
