

# Just Friends (feat. Boy Matthews)

Hayden James

When it's late at night  
Do you recall that night?  
'Cause I think about it sometimes  
I'm just lying, it's all the time, babe I found out the way to your heart  
And found myself completely lost  
Whatever, it doesn't matter, we fine  
I don't need to label how we good time  
And we don't need to tell nobody we ride  
'Cause fuck it, we're young, it's just fun  
It started off just a touch innocent  
Like friends, like friends, yeah  
Wake up here, tired, horizontal  
We just friends, just friends  
Maybe one drink, nothing too far gone (too far)  
Is it the stars saying fall in love, no  
We don't say much as we lay here  
We just friends, just friends When you say my name  
So casual touch, my hand  
I stop and play it cool  
Like I'm not into you  
But I'm just lying  
You drive me wild and say  
I found out the way to your heart  
And found myself completely lost  
Whatever, it doesn't matter, we fine  
I don't need to label how we good time  
And we don't need to tell nobody we ride  
'Cause fuck it, we're young, it's just fun It started off just a touch innocent  
Like friends, like friends, yeah  
Wake up here, tired, horizontal  
We just friends, just friends  
Maybe one drink, nothing too far gone (too far)  
Is it the stars saying fall in love, no  
We don't say much as we lay here  
We just friends, just friends I found out the way to your heart  
And found myself completely lost  
Whatever, it doesn't matter, we fine  
I don't need to label how we good time  
And we don't need to tell nobody we ride  
'Cause fuck it, we're young, it's just fun It started off just a touch innocent  
Like friends, like friends, yeah  
Wake up here, tired, horizontal

We just friends, just friends  
Maybe one drink, nothing too far gone (too far)  
Is it the stars saying fall in love, no  
We don't say much as we lay here  
We just friends, just friends
