

Over & Over

Smallpools

It was a company event
With a margarita tent
I said "how's your week?"
She said "man I'm spent"
And I could use a crazy night
And I would love to see Chennai
We could commandeer a little plane and fly
Or we could just skip stones in the shade
I wanna call you mine, and never let you down
I wanna feel it's right, over and over
I wanna get inside, and take it up and down
I wanna live this night over and over
She had a finger on the braille, we let a thimble go to jail
A little wooden sign that said, "brace yourself"
Whoa oh whoa oh whoa
I wanna call you mine and never let you down
I wanna feel this right over and over
I wanna get inside and take it up and down
I wanna live this night over and over
And if we have to flee the city, from the parlor to the well
All we'll have to show for leaving, is a penny soaked to hell
And if we have to flee this city, from the parlor to the well
All we'll have to show for leaving is a penny soaked to hell
I wanna call you mine and never let you down
I wanna feel this right over and over
I wanna get inside and take it up and down
I wanna live this night over and over
