

Nothing's Changed

Chris Isaak

Let's take a drive through the old town
Back past the place where we met
Some things are hard to remember
Some things you'll never forget
Let's take a walk down your old street
Who lives in your house today?
Let's see if we can remember
All of the vows that we made
Kisses you gave me
The vows you made me
None of these things have changed...
Nothing's changed
Nothing's changed
Young lover's stand in the showroom
New lovers taking our place
And though you're gone I remember
And I can still see your face
Kisses you gave me
The vows you made me
None of these things have changed...
Nothing's changed
Nothing's changed
