

# The Fix (Plan B Remix)

## Minus the Bear

A swimming pool with no bodies  
is a problem that we can fix.  
He dropped his clothes on the chaise lounge  
and asked, "Are you gonna come in?"  
and in the night the only light  
was the glow of the surface.  
As they slid in the rest of them  
continued their talking and drinking.  
They'll never notice us.

(Chorus)

So this is the difference between  
living and not living  
these are just bodies.  
We have a purpose  
and the gravity  
pulling us from them to we.  
The distance between our bodies  
is a problem we can fix.  
They moved slow through the current and found  
their bodies touching.  
Her hands move to pull him under  
for some kind of kiss,  
as he slides in the rest of them  
continue their talking and drinking.(Chorus x2)
