

Lifeline

Thousand Foot Krutch

Cut me like those words you throw
Console me when you want control
Roll me in those lies you've told
But I won't play these games no more and (Don't run and hide, stand up and fight)
I'm feeling like just letting go
(It's shaking your mind with cause and divide)
It's taking everything I know
(Don't run and hide, stand up inside)
The wheels keep burning
I'm about ready to blow
When I get angry, I feel weak
And hear these voices in my head
Telling me to fall beneath
Cause they'll make everything okay
How did I get here?
Everything's unclear
I never meant to cause you pain
Give me a reason I can believe in
I need it all this time
Send me a lifeline Wave if it makes you look good
Smile when you feel like you should
It's hard not to treat this like I could
Heaven help me, it's overwhelming
(Don't run and hide, stand up and fight)
I'm feeling like just letting go
(It's shaking your mind with cause and divide)
It's taking everything I know
(Don't run and hide, stand up inside)
The wheels keep burning
I'm about ready to blow When I get angry, I feel weak
And hear these voices in my head
Telling me to fall beneath
Cause they'll make everything okay
How did I get here?
Everything's unclear
I never meant to cause you pain
Give me a reason I can believe in
I need it all this time
Send me a lifeline When I get angry, I feel weak
And hear these voices in my head
Telling me to fall beneath
Cause they'll make everything okay

How did I get here?
Everything's unclear
I never meant to cause you pain
Give me a reason I can believe in
I need it all this time
Send me a lifeline
When I get angry, I feel weak
And hear these voices in my head
Telling me to fall beneath
Cause they'll make everything okay
How did I get here?
Everything's unclear
I never meant to cause you pain
Give me a reason I can believe in
I need it all this time
Send me a lifeline
