Lifeline

Thousand Foot Krutch

Cut me like those words you throw Console me when you want control Roll me in those lies you've told But I won't play these games no more and(Don't run and hide, stand up and fight) I'm feeling like just letting go (It's shaking your mind with cause and divide) It's taking everything I know (Don't run and hide, stand up inside) The wheels keep burning I'm about ready to blow When I get angry, I feel weak And hear these voices in my head Telling me to fall beneath Cause they'll make everything okay How did I get here? Everything's unclear I never meant to cause you pain Give me a reason I can believe in I need it all this time Send me a lifelineWave if it makes you look good Smile when you feel like you should It's hard not to treat this like I could Heaven help me, it's overwhelming (Don't run and hide, stand up and fight) I'm feeling like just letting go (It's shaking your mind with cause and divide) It's taking everything I know (Don't run and hide, stand up inside) The wheels keep burning I'm about ready to blowWhen I get angry, I feel weak And hear these voices in my head Telling me to fall beneath Cause they'll make everything okay How did I get here? Everything's unclear I never meant to cause you pain Give me a reason I can believe in I need it all this time Send me a lifelineWhen I get angry, I feel weak And hear these voices in my head Telling me to fall beneath Cause they'll make everything okay

How did I get here? Everything's unclear I never meant to cause you pain Give me a reason I can believe in I need it all this time Send me a lifeline When I get angry, I feel weak And hear these voices in my head Telling me to fall beneath Cause they'll make everything okay How did I get here? Everything's unclear I never meant to cause you pain Give me a reason I can believe in I need it all this time Send me a lifeline Song Discussions is protected by U.S. Patent 9401941.
