

# We All Get Lonely

## Trampled By Turtles

There was never any simple way  
To leave this behind  
Never any words to say  
To speed up the time  
Positive and moving t'ward  
A home we can't find  
I never meant to make it any harder  
Winter comes and it gets dark and the branches creak and  
moan  
Straighten up your shirt and head out on your own  
Shake the little demons out of the corners of your mind  
With you here I know we can go farther  
We all get lonely  
There's no way around it  
We all get lonely  
Yeah then we make it through  
We all get lonely  
There's no way around it  
We all get lonely  
Yeah then we make it through  
It's pale in here and the floorboards creak,  
The ceiling reaches down  
Started out a big, bright city, now it's a small town  
Every one you never wanted to run into again  
Is sitting at this bar next to each other  
We all get lonely  
There's no way around it  
We all get lonely  
Yeah then we make it through  
We all get lonely  
There's no way around it  
We all get lonely  
Yeah then we make it through
