

# She Chose Me

[Randy Newman](#)

I'm not much to talk to, and I know how I look  
What I know about life comes out of a book  
But of all of the people there are in the world she chose me  
Most of my life, been on my own  
Whatever I did, I did it alone  
And then she came along, now I'm not alone, since she chose me  
Every night I thank the lucky stars above me  
That someone as beautiful as she could really love me and she really loves me  
From time to time, I ask myself why was it I and nobody else  
The most beautiful girl that I'd ever seen, and she chose me  
And she really loves me  
From time to time, I ask myself why was it I and not someone else  
The most beautiful girl in all of the world, and she chose me
