

She Chose Me

[Randy Newman](#)

I'm not much to talk to, and I know how I look
What I know about life comes out of a book
But of all of the people there are in the world she chose me
Most of my life, been on my own
Whatever I did, I did it alone
And then she came along, now I'm not alone, since she chose me
Every night I thank the lucky stars above me
That someone as beautiful as she could really love me and she really loves me
From time to time, I ask myself why was it I and nobody else
The most beautiful girl that I'd ever seen, and she chose me
And she really loves me
From time to time, I ask myself why was it I and not someone else
The most beautiful girl in all of the world, and she chose me
