She Chose Me

Randy Newman

I'm not much to talk to, and I know how I look What I know about life comes out of a book But of all of the people there are in the world she chose meMost of my life, been on my own Whatever I did, I did it alone And then she came along, now I'm not alone, since she chose meEvery night I thank the lucky stars above me That someone as beautiful as she could really love me and she really loves meFrom time to time, I ask myself why was it I and nobody else The most beautiful girl that I'd ever seen, and she chose me And she really loves me From time to time, I ask myself why was it I and not someone else The most beautiful girl in all of the world, and she chose me
