

# How the Day Sounds

Greg Laswell

Who would have ever known this  
Could be this easy, oh  
I was a long, long way off  
Then just like that it's over  
Everything that I knew of love  
I was a long, long way off  
And I think I like how the day sounds Like how the day sounds  
Through this new song  
Thank you for opening a window  
The sky is clear as my mind is now  
I was a long, long way off  
Join me in welcoming the sun in  
It's much brighter than the night I hid in  
I was a long, long way off  
And I think I like how the day sounds  
Like how the day sounds  
Through this new song And I think I like how the day sounds  
Like how the day sounds  
Through this new song  
From a long way down  
Yeah, it's well worth the time  
That it's taken to get here now  
Yeah, it's well worth the time  
That it's taken to get here now Ba da dum  
So go ahead and bang a gong  
Nothing can drown out the sound  
Of the whisper of my love  
And I think I like (like how the day sounds) How the day sounds (like how the day  
sounds) Through this new song  
And I think I like (like how the day sounds)  
How the day sounds (like how the day sounds)  
Through this new song Through this new song  
And the lines have all been drawn  
I know where I belong  
Where I belong  
Where I belong  
And the lines have all been drawn  
I know where I belong  
Where I belong  
And I think I like how the day sounds  
Like how the day sounds Through this new song  
And I think I like how the day sounds

Like how the day sounds  
Through this new song  
Oh, won't you sing along  
Oh, my love, won't you sing along  
Oh, won't you sing along  
Oh, my love, won't you sing along  
Oh, won't you sing along  
Oh, my love, won't you sing along  
Oh, won't you sing along  
Oh, my love, won't you sing along
