## Vote With a Bullet

## **Corrosion of Conformity**

The number in nations The god in their hearts The justice in swine The devil in GodVOTEThis long hand that breaks our backs Still casting shadows on all that we see Unjustified... mercy killing is just a feeling To keep our numbers from being free(Chorus) Prison for praise is not worth thinking Sin is still in and our ballots are shrinking So unleash the dogs - the only solution Forgive and forget, fuck no I'm talking about a revolution The prophet man's got a needle in his hand

Draws his dreams from your soul - bleeding minds into sand

The year of the fear has arrived decades too late And our right to stand and fight is now solely sealed in fate(Repeat first chorus)One last chance mission with a vision 'cos our lives are just cards i their stack

Our time is short but theirs is shorter How much longer can they hold us back(Chorus)

Prison for praise - the obvious answer Once had power mad - living disaster Don't fuck with me 'cos I'm on a freedom train

> That bears no name - this time I'm voting with a bullet

This view they once knew made our nooses too tight This justice in swine

This devil in godSo God bless my soul - I've got total control And the crosshairs lined up dead in my sightI'm voting with a bullet Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
