All the Lovers In the World

Gowan

With urgent hands we excited
A fire so hot, two lives were ignited
Now I'm left here on my own
But I'll never be aloneDown forbidden streets I talk with
Every single step I walk with
All the lovers in the world (all the lovers in the world)
Though the lonely night's returning
I can feel the flame that's burning
All the lovers in the worldVirgin lips I have tasted

Love so pure, not a drop was wasted (not a drop was wasted)

Paradise we shared together
Lives inside of me forever
Down forbidden streets I talk with
Every single step I walk with

All the lovers in the world (all the lovers in the world)

Though the lonely night's returning I can feel the flame that's burning

All the lovers in the world (all the lovers in the world)Since you touched me, I can't be free This is every lover's destinyDown forbidden streets I talk with

Every single step I walk with

All the lovers in the world (all the lovers in the world)

Though the lonely night's returning I can feel the flame that's burning

All the lovers in the world (all the lovers in the world)

Down forbidden streets I talk with Every single step I walk with

All the lovers in the world (all the lovers in the world)The lovers in the world (all the lovers in the world)

Though the lonely night's returning I can feel the flame that's burning
