

Bite Down (feat. Lil Narnia & Local Zero)

Belle Delphine

I know it's all my fault again
Cut me out like your favorite things
What a wonderful way to die tonight
By your side where I wanna be
In between you and your eyes
And I think that I'll be fine
Cut the seams and pull me out
I know you don't need me around, it's alright
I've known it this whole time
Tried my hardest anyway
You ignored it face to face
Only want what we can't have
And you always seem so sad
I want you as you are
So picture perfect, hearts on my head
Oh, I hate how... we only talk when it's not important
And I've finished off all my options, I can't get it right
Just say it soft like the frost falling straight from your eyes
Getting caught in my thoughts like your fangs and the bite
Let go or swallow me, I'm tired
And if you leave just say goodbye first
Sharpen your teeth, you look like my worst nightmare
Goodnight, my dear
