

# Settin' the World On Fire

Jake Owen

Well that big red sun was sinkin' slow  
That rising had a haunting glow  
I could see those heat waves rising off the ground  
We were sittin'on go at that old stop sign  
Headlights shinin' on the county line  
It was do or die, had to get out of that town  
Well honey, you said run  
We were so young  
Tryin' to the world on fire  
Turn the key and spark the wire  
Chasin' down a feelin' runnin' on desire  
The future was an open road  
Gone in a cloud of smoke  
Leavin' a trail of flames behind those tires  
Just you and me girl, settin' the world on fire  
Yeah, we were settin' the world on fire  
We were blazin' down the road like Kerouac  
No time to stop and cover our tracks  
We were too damn hot for any one town to hold  
Yeah, we burned through a few good years  
Then you started looking back in that rear view mirror  
Right outside of Reno the trail got cold  
You said you'd had enough of this ramblin' love  
Tryin' to the world on fire  
Turn the key and spark the wire  
Chasin' down a feelin' runnin' on desire  
The future was an open road  
Gone in a cloud of smoke  
Leavin' a trail of flames behind those tires  
For a while there girl, we were settin' the world on fire  
Pullin' on a lucky strike 'bout to head west  
Ridin' off into God's sunset  
It's times like this a always think of you  
But honey you know me I'll always be.  
Tryin' to the world on fire  
Turn the key and spark the wire  
Chasin' down a feelin' runnin' on desire  
The future was an open road  
Gone in a cloud of smoke  
Leavin' a trail of flames behind these tires  
See I'm out here girl settin' the world on fire  
I'm settin' the world on fire

Yeah, I'm settin' the world on fire
