

# Magma

## GOJIRA

Analyse this chemistry  
Producing poison  
And creeping in you veins  
For the love of bloodThe poison slowly spreads  
Through the body and the mind  
Close your eyes and drop your things  
Be ready to flyYou are now, high  
In the sun, burn  
You're away, alive  
On the moon, round  
After walking all the miles  
Consumed into your bones  
And breathing all the dust  
Of the desert landI know that all long  
You were doing it for absolution  
It's written in you eyesYou are now, high  
In the sun, burn  
You're away, alive  
On the moon, round  
Away  
Just want to fly away, always higher  
Away  
Embrace the light on the other side
