

Lightyears

Kimbra

Lightyears from everyone
Stranded on a foreign sun
Blacks are upon the edge
Am I the only one out here?
Days in the daytime light
Floating in a violet sky
Am I the only one?
The only one around out here? Open my eyes
I see someone I used to be
When I open my eyes
It's so coming back to me
Come and take me lightyears
Back to where we're from
We could be together that's where we belong
Are you out there?
Come and send me a sign
As long as we're together we could go all night
As long as we're together we can make it if
you're ready
As long as we're together we can go all night
As long as we're together we can make it if you're ready
As long as we're together we can go all night
Lightyears from everyone
I wonder what have I become
Washed upon a distant shore
Thought that I could beg for more
So fast we're out of sight
Moving at the speed of light
Pumping our hearts in time
Break through the atmosphere
So hot that I can't see
It's so coming back to me
Come and take me lightyears
Back to where we're from
We could be together that's where we belong
Are you out there?
Come and send me a sign
As long as we're together we could go all night
As long as we're together we can make it if
you're ready
As long as we're together we can go all night
As long as we're together we can make it if you're ready
As long as we're together we can go all night
As long as we're together we can make it if you're ready
As long as we're together we can go all night
As long as we're together we can make it if you're ready

As long as we're together we can go all night
Come and take me lightyears
Cuz that's where we're from
We to be together that's where we belong
Tell me, are you out there?
Can you send me a sign?
Long as we're together we could go all night
As long as we're together we can make it if you're
ready
As long as we're together we can go all night
As long as we're together we can make it if you're ready
As long as we're together we can go all night
