

# The Fall

## Electric Light Orchestra

I see the early glow, I hear you say hello  
I watch the shadows fall, I don't see you at all  
It's a lie (I don't believe it's so), it's a lie  
I see the autumn rain, falling on my window pane

I hear you say goodbye, I see a tear in your eye  
Chorus:

It's a lie (I don't believe it's so), it's a lie

Our love couldn't go wrong, how could I know I was only dreaming

And now, now that you're gone, I will go on really believing

I take the fall

I see you slip away, into another day

There's no-one else around, I watch the sun go down  
chorus (Instrumental break) I take the fall

see you in a dream, you turn and start to go

I call to you once more, guess that I'm takin' the fall

chorus Our love couldn't go wrong, how could I know I was only dreaming

And now, now that you're gone, I will go on really believing

I take the fall
