

November Skies (feat. Nina Kinert)

Tomas Barfod

Lived a lifetime in the hunger
Been too long for all the fear
Never did I hear the thunder
I got tired of hearing the rain!
It was welcome when I knew it
All I wanted was in you
Waited long to see the light in the crack
And you're here and I know it cause...I can not only see the colours now
I can not only see the colours now
I can not only see the colours now
I can do everything, everythingI can not only see November Skies
I can not only see November Skies
I can not only see November Skies
I see you everywhere, everywhere!
Lived a life time in the hunger
Lived too long for all the fear
Never did I hear the thunder
I got tired of hearing the rain
And it was welcome when I knew it
What I wanted was in you
Waited long to see the light in the crackI can not only see the colours now
I can not only see the colours now
I can not only see the colours now
I can do everything, everythingI can not only see November Skies
I can not only see November Skies
I can not only see November Skies
I see you everywhere, everywhere!
Oh, oh, oh
Now my eyes are coloured greener
And the mermaids sing along with me
Did you always look so shiny?..
Can we live without wanting
Every breath within the swing of your bone
And we dance to the full moonlight, full moonlightI can not only see November Skies
I can not only see November Skies
I can not only see November Skies
I see you everywhere, everywhere!I can not only see November Skies
I can not only see November Skies
I can not only see November Skies
I see you everywhere, everywhere!I can not only see November Skies
I can not only see November Skies
Everywhere, everywhere!I can not see November Skies

I can not see November Skies
I can not see November Skies
Up like this, up like this...
