

Bite My Tongue

Party Pupils

[Chorus]

I'm feeling much better now
I just thought I should let it out
Before I go bite my tongue
What have you done?[Verse 1]
It's happening again
You say you've lost your only friend
The night goes by and you're scaring me half to death
And now you see in her eyes [?]
Best friends should never fight
So try walk away without causing a scene

[Bridge]

There's a lot to say about the nice guy
But he's not gonna say it himself
And as for the bad boys
Well they're not good for your health[Chorus]
I'm feeling much better now
I just thought I should let it out
Before I go bite my tongue
What have you done?
I wanna drink lemonade
And never rain on your parade
My dear, what have we become?
So I'll just bite my tongue[Verse 2]
It's happening again
You say you've lost your only friend
The night goes by and you should've been home by ten

[Bridge]

There's a lot to say about the nice girl
But she's not gonna say it herself
And as for those bad girls
Well they're not good for your health[Chorus]
I'm feeling much better now
I just thought I should let it out
Before I go bite my tongue
What have you done?
I wanna drink lemonade
And never rain on your parade
My dear, what have we become?
So I'll just bite my tongueI feel much better
What you become
You don't know[Chorus]

I'm feeling much better now
I just thought I should let it out
Before I go bite my tongue
What have you done?
I wanna drink lemonade
And never rain on your parade
My dear, what have we become?
So I'll just bite my tongue
I'm feeling much better now (oh, oh)
I just thought I should let it out
Before I go bite my tongue (woo!)
I wanna drink lemonade (I wanna drink lemonade)
And never rain on your parade (never rain)
My dear, what have we become? (My dear, what have we become?)
So I'll just bite my tongue
