

# Tin Foil Hats

## Astronoid

Awake we dream through life  
The morning awaits us  
The sun blooms with radiant light  
Beautiful waves shine upon us  
This new breath fills my lungs with new hope of change  
Embrace me  
My heart is open  
The clouds will part the sky  
The sun shines on my face  
You seek out  
The missing piece  
Find out  
What's gone from your heart  
Was it there before?  
Find out  
What love left you  
We are free  
A new day  
The sun shines bright for us
