## Storm the Sky

The stage has been set and this bitch has been warned  
We're not moving forward we're just moving on  
The stage has been set and this bitch has been warned  
We're not moving forward we're just moving on  
What are you waiting for? What are you waiting  
for? The stage has been set and this bitch has been warned  
We're not moving forward we're just moving on  
The stage has been set and this bitch has been warned  
We're not moving forward we're just moving on
