## Don't Go

## **En Vogue**

I'm so glad to see you Now I have the chance to say Our love's been growing freely What must I do to make you stayDon't goI feel the time is right 'Cause my love for you has grown Up until this very night I had doubts your love was strong enough To break me down Now I'm caught up in this web You've spun for me tonight Don't goIt takes a gifted man To release the love in me So far you're the only man Who has gone this far for me It feels it's out of my hands Can't think twice, it's much too right This may be my only chanceDon't goI've been such a fool To have kept my love for you Could have lost your love Searching for the truth Don't go nowhere, you know I care Stay right here with me forever, babyDon't go Let's make sweet love tonight I won't put up any fight Your wish is my command Lay me down upon my bed And make me feel the heat Of your body next to mine I just have one demandDon't goYou send chills down my spine I surrendered all my love You captured all my life In just one night of ecstasy You brought me to my knees Your first bite was just to strong You left a scar on meDon't goI've been such a fool To have kept my love from you Could have lost your love Searching for the truthDon't goI'm so glad to see you Now I have the chance to say Our love's been growing freely What must I do to make you stayDon't go
