

# Run Down the Devil

[Alice Cooper](#)

It's twelve o'clock in the mornin'  
While everybody is sleepin'  
I want him dead in my head lights  
Cuz in the shadow he's creepin'Drive on down to lonely street  
He's always waiting there for me  
Run down the devil, run the devil down  
Run down the devil, run him down, down, down  
Run down the devil, run the devil down  
Run down the devil, run him down, down, down  
I want to take him to the Mercury grill  
I hope he's ready for the big blast  
He'll be my ultimate road kill  
I'll kick his future up his pastI'll send him back to hell alright  
The world can sleep in peace tonight  
Run down the devil, run the devil down  
Run down the devil, run him down, down, down  
Run down the devil, run the devil down  
Run down the devil, run him down, down, down  
Everybody's gotta hold him down  
Can't let Beelzebaby back in town  
Run down the devil, run the devil down  
Run down the devil, run him down, down, down  
Run down the devil, run  
Run down the devil, run him down, down, down  
Run down the devil, run the devil down  
Run down the devil, run him down, down, down  
Run down the devil, run  
Run down the devil, run him down, down, down
