

Our Special Love (feat. Peter Hollens)

Brian Wilson

Bet you wish it really didn't matter
All along you never really had her
She's your everything
Keeps you wondering Doesn't matter where we are
Doesn't matter where we've been
I can't believe it's gone this far
I can't believe what's happening Tell me why, down deep inside
Girl you gotta know
That there's a part of you and me
That I just can't let go
Fly away (Fly away)
Nothing, but nothing
Could ever stand in our way A special love can't be found anywhere in the world
Except for here, that's where you are
What I'm thinking of can't be found anywhere in the world
Except for here, that's where you are If you knew that you would fall when you first met her
Now she's gone and you just can't forget her
How'd your everything leave you wondering Fly away (Fly away)
Nothing, but nothing
Can stand in our way A special love can't be found anywhere in the world
Except for here, that's where you are
What I'm thinking of can't be found anywhere in the world
Except for here, that's where you are
Bet you wish it really didn't matter
All along you never really had her
She's your everything
Makes you wanna sing
