Big Black Heaven

Patti Scialfa

You promised me There'd be no denials When I was weak Under your spell When I feel thirsty You would not let me Take water from your well Well big black road Big black river Big black heaven In the sky above I need someone I can talk to I need someone I can love So I went down to that valley To a boy that I once knew And he looked at me so tender Oh baby like you used to do Well big black road Big black river Big black heaven In the sky above I need someone I can talk to I need someone I can love So I crossed That river of temptation And I lay down In that young boys arms And there I claimed my destination Through this One last unforgiving harm Well big black road Big black river Big black heaven In the sky above I need someone I can talk to I need someone I can love
