

# Violence & Force

## Exciter

Living in fear in the ditches at the front  
Fighting for my life never knowing what's to come  
Shell shock, heart attack eats me to the bone  
Through the darkest Hell this battle rages on & on  
Enemy attack walls of fire burn the sky  
Fighting with the rats of war, preparing to die Violence & Force  
Taken by Violence & Force  
Violence & Force  
Taken by Violence & Force  
Armed with the weapons the power and the might  
Opening fire defacing all in sight  
Nuclear disaster forget about the war  
A touch of switch no man will exist no more  
Enemy attack walls of fire burn the sky  
Fighting with the rats of war, preparing to die Violence & Force  
Taken by Violence & Force  
Violence & Force  
Taken by Violence & Force Life on the stage is like the bloody crypts of war  
Mind ripping metal shouting out for more  
Fire bombs & smoke white beams from the lights  
The scene of a battle burning in the night  
Leave behind the weak we must take the strong in hand  
Together are the wicked violent forces in command  
Violence & Force  
Taken by Violence & Force  
Violence & Force  
Taken by Violence &  
Force!
