6's to 9's (feat. Rationale)

Big Wild

I want you to hold me

Come and lay with me

Set aside your problems with me babySave your conversation for the basement (Yeah)

I want you speaking in tongues

You know what they say about those They come together, look we're together

You can't let them slip away

You can't let them slip away

A good thing together, so unpredictable

But one thing I know for sure

You turn my sixes to nines

Frequently fly, we can't deny, no

This feeling tonight

I know I weaken when I

When I look in your eye

And you're holding me tight

We're in love, you and I

You turn my sixes to nines

You turn my sixes to ninesI want you to hold me

Ride this with me

Search inside your inhibitions maybe

Sometimes when it feels right (Feels right)

Maybe it's alright (Alright, alright)

I want you speaking in tongues

Know what they say about those

They come together, look we're together

You can't let them slip away

You can't let them slip away

A good thing together, so unpredictable

But one thing I know for sureYou turn my sixes to nines

Frequently fly, we can't deny, no

This feeling tonight

I know I weaken when I

When I look in your eye

And you're holding me tight

We're in love, you and I

You turn my sixes to nines

You turn my sixes to nines

You turn my sixes to ninesFrequently fly, we can't deny, no

This feeling tonight

I know I weaken when I

When I look in your eye

And you're holding me tight

We're in love, you and I You turn my sixes to nines
