

# Write Your Name (feat. Mona Moua)

## Yelawolf

I'll write your name across the sky  
And take away the stars cause you light up the night  
Feel as high as the moon when you're here with me  
That's why I'm gonna write your name for the world to see  
Another old man on the porch with a  
bottle

Wind blows and the old rocking chair wobbles  
He's just a waving, everybody's welcomed  
All he can say about the youth is Lord help 'em  
Gotta couple grandbabies but they never call though  
Let him in the South and they moved to Chicago  
Wife's in Heaven and he says ever since  
Vietnam life's been hard as a veteran  
Simple life just a 6-pack, ice cold  
Crossed the Georgia line for a ticket for the Lotto  
Probably never see his name in the headlines  
But if I had a plane I'd put it in the sky  
Alabama!

I'll write your name across the sky  
And take away the stars cause you light up the night  
Feel as high as the moon when you're here with me  
That's why I'm gonna write your name for the world to see  
She's in love yeah, friends call her  
crazy

Met him at a party they started dating  
Daddy's little angel, mama's little lady  
Only sixteen now Brenda's got a baby  
She can't afford to, drop out of high school  
Jimmy's not a man and he can't provide you  
He doesn't want to, but you kept it anyhow  
Nine months down the road, whatcha gonna do now?  
Go to the food stamp office and apply  
If you find a job it'll help you get by  
And you made it when you didn't know how  
Now that's a real star, put her name in clouds  
Alabama!

I'll write your name across the sky  
And take away the stars cause you light up the night  
Feel as high as the moon when you're here with me  
That's why I'm gonna write your name for the world to see  
You may never be on television  
Or be the one your boss at work loves  
Giving you employee of the month  
You may never be the first string on a champion team  
You may be the star the world just hasn't seen

But that don't make you any less of a star to God  
Being rich is only realizing it's all a facade  
You're richer than you think in that old small town  
Cause people like you make the world go 'round  
Alabama! I'll write your name across the sky  
And take away the stars cause you light up the night  
Feel as high as the moon when you're here with me  
That's why I'm gonna write your name for the world to see  
I'll write your name across the sky  
And take away the stars cause you light up the night  
Feel as high as the moon when you're here with me  
That's why I'm gonna write your name for the world to see
