

# The 2nd Law: Unsustainable

## Muse

All natural and technological processes  
proceed in such a way  
that the availability of the remaining energy decreases.

In all energy exchanges  
if no energy enters or leaves an isolated system  
the entropy of that system increases.  
Energy continuously flows from being concentrated  
to becoming dispersed, spread out, wasted and useless.

New energy cannot be created  
and high grade energy is being destroyed.

An economy based on endless growth is  
Unsustainable

Unsus-

Unsustain- unsustain- unsust-

Unsus-unsustaina- unsustainableUnsus-

unsustain- unsustain- unsust-

Unsus- unsus-

You're unsustainable

Unsustaina- unsustainable

The fundamental laws of thermodynamics  
will place fixed limits on technological innovation  
and human advancement.

In an isolated system the entropy can only increase.

A species set on endless growth is

Unsustainable

Unsus-

Unsustain- unsustain- unsust

Unsus-

unsustaina- unsustainable

Unsus-

unsustain- unsustain- unsust-

Unsus- unsus-

You're unsustainable
