

Far Cry

Jack Garratt

I build to break
I give to take
Mind, body and soul
I feel to burn
I hear to hurt
Human after all...
But I can feel I am far from grace
Thirsty for your warm embrace...
Upon my arms
Think of all the infinite ways...
You could think of something to say
But fall down
Give me something I can't be without
Give me reason to follow you around
I really want to
I'd really love to
Give up, lay down
Sink deep in the ground
Become the fall
I'd run and hide
Cower from the night
Be still my soul
I can feel that I am far from grace
Thirsty for your warm embrace
Under my arms
I think of all the infinite ways
You can make me feel ok
But for now...
Give me something I can't live without
Give me reason to follow you around
I really want to
I'd really love to
If you hold when I know nothings right
I'll be taking you home tonight
I really want to
I'd really love to
Tell me someone I will be fine
Before the far cry
calls into the night
Help me to love
Hard as I might
And get by

And get by
Tell me someone
I will be fine
Before the far cry calls into the night
Help me to love
Hard as I might
And get by
And get by
And get by
And get by
And get by
And get by
And get by
And get by
And get by
And get by
And get by
