

Light Years (feat. Rivers Cuomo)

[Steve Aoki](#)

Light years we've come to call upon you now
We can see you standing in the crowd
Light years we've come to call upon you now
We can see you standing in the crowd
Light years we've come to call upon you now
We can see you standing in the crowd
Light years, lights years, lights years, lights years
To call upon you now
We are making contact, calling from the stars
And you know who we are
We are making contact, calling from the stars
And you know who we are
To call upon you now, to call upon you now, to call upon you
now
Light years we've come to call upon you now
We can see you standing in the crowd
Light years we've come to call upon you now
We can see you standing in the crowd
We are making contact, calling from the stars
And you know who we are
We are making contact, calling from the stars
And you know who we are.
