

Better

COIN

Am I too much to handle,
Is it all in my head
In time comes an answer,
I'll sleep here instead
I only really want the truth,
A little more than I want you
What you say, what you say,
Can always get better, if you try
What's the matter when it feels right
I broke all of my habits
To mirror your magic
Somehow you resist it
So casually committed
I only really want the truth
A little more than i want you
What you say, what you say
Can always get better, if you try
What's the matter when it feels right
What you say, what you say
Can always get better, if you try
What's the matter, it feels right
I only really want the truth
A little more than I want you
What you say
What you say, what you say,
Can always get better if you try
Whats the matter when it feels right
