

# Genedefekt

## Green Velvet

As I stepped into the room  
Distorted from VIP fumes  
The doctor said to me, "We have a remedy" They gave me pills for my pills  
When I complained they said, "Chill"  
My prescriptions they were filled  
For dollar bills Rid the world of defects  
It's unbelievable, it's inconceivable, incomprehensible  
Gene defect, gene defect  
I'm looking forward to the  
The day when they will say, "Ah,  
We love you the way you are"  
Gene defect, gene defect  
Instead of asking me how, when and why  
It all began  
They acted as if they knew me  
Like my best friends They gave me pills for my pills  
When I complained they said, "Chill"  
My prescriptions they were filled  
For dollar bills Rid the world of defects  
It's unbelievable, it's inconceivable, incomprehensible  
Gene defect, gene defect  
I'm looking forward to the  
The day when they will say, "Ah,  
We love you the way you are"  
Gene defect, gene defect  
The drug industry has fooled me  
Into believing I'm defected  
And only they can correct it  
(It ain't worth it to be perfect) Rid the world of defects  
It's unbelievable, it's inconceivable, incomprehensible  
Gene defect, gene defect  
I'm looking forward to the  
The day when they will say, "Ah,  
We love you the way you are"  
Gene defect, gene defect It's unbelievable, it's inconceivable, incomprehensible  
Gene defect, gene defect  
I'm looking forward to the  
The day when they will say, "Ah,  
We love you the way you are"  
Gene defect, gene defect
