

# Afterglow

## Scandroid

When we're living under midnight  
Lights shimmer off the walls  
These feelings rise into the sky  
Our fears faded with the twilight  
Our tears mingle as we fall  
In moonlight this love is amplified  
In stereo  
We both let go  
Into the flow  
You and I will ride the afterglow  
The last traces of the sunlight  
They wish us their last farewell  
The streetlights lit up like fireflies  
The faint glow of distant starlight  
Keep the secrets that we tell  
Our bodies' vibrations multiply  
In stereo  
We both let go  
Into the flow  
You and I will ride the afterglow  
Beneath the dome  
So far from home  
In monochrome  
You and I will ride the afterglow  
(You and, you and I)  
(You and, you and I)  
(-glow, you and, you and)  
(-glow, ride, you)  
Two shadows in the moonlight  
Two bodies parallel  
We're lost in the datastream tonight  
(You and I will ride the afterglow)  
In stereo  
We both let go  
Into the flow  
You and I will ride the afterglow  
Beneath the dome  
So far from home  
In monochrome  
You and I will ride the afterglow  
(In stereo)  
(We both let go)  
(Into the flow)  
(You and I will ride the afterglow)  
(Beneath the dome)  
(So far from home)  
(In monochrome)

(You and I will ride the afterglow)  
(You and I will ride the afterglow)
